

My name is Laurence Carlier and I have been working at ISS GMT for 8 years. Originally I am from a little town in Northern France called Carvin located in the Pas-de-Calais region. After graduating with an English major at the Université d'Artois in 2001, I started my American journey. I was accepted as an intern for AIR FRANCE at Miami International Airport. The 18 months internship turned into a 3 year adventure. I welcomed a new challenge and that is where I crossed paths with Tim Davey, who introduced me to the yachting industry.

Starting in 2004, I became a booking agent for the yacht division at GMT. Over the next couple of years I was getting more involved in the sales department. Getting to know the Captains and crew that fly using ISS GMT is one of the highlights of my job, not to mention traveling all over the world to the major yacht hubs (especially to the French Riviera). I am sure I have met lots of you and I look forward to seeing you again.

In May 2010 GMT was acquired by Inchcape Shipping Services (ISS), one of the largest marine service providers for commercial vessels and GMT rebranded to ISS GMT. This merger gave me a great opportunity to move on to being the Global Sales Coordinator ISS GMT yacht division.

I will continue to provide you with the best service in the industry! See you on the docks.

Cheers!

Laurence
